The Chicago printer uses both an **electronic scheduling** system and a traditional **board**. Once a customer service representative (CSR) writes a **job** ticket, one of two managers actually **schedules** the **job**. They preview the order and enter it into the **electronic** scheduling system, determining the appropriate press for the **job** based on press loads and crew manning. If a job cannot be finished by the...Citrix Meta frame server that support 45 computers. Only production managers have access to the **electronic board**, but all employees can view the **schedule**. Employees on the shop floor have access to data collection, **job** tickets, scheduling and e-mail.

Electronic scheduling systems take on many different forms. According to...
